

YOU
SAVE THE MONEY,
YOU
SAVE THE PLANET,
WE
DO ALL THE WORK!

Green Homes makes your home more efficient, and helps you produce power from the wind and the sun. You save money on your bills and get a more comfortable home. Best of all, we do all the work!

Save money: Green Homes automatically groups you with others in your community who also want to improve their homes. We negotiate with our partners to get a group discount of up to 30%! And afterwards, your electricity bills will be reduced by up to 60%.

Comfort: an efficient home is a comfortable home. After consulting with Green Homes, your home will be less drafty, and will heat and cool more evenly.

Simplicity: Green Homes negotiates the discounts on all the technology and installation, and provides you a single contact point for any problems or maintenance. All you need is a willingness to make your home even better!

Help the planet: households account for 20% of greenhouse gas emissions in France – plus other harmful emissions like the ones that cause acid rain and smog. Partner with Green Homes to make our climate safe and our air clean!
